

EDUCATION

University of New South Wales, Sydney, AU • Bachelor of Science (Computer Science)	August 2023 – <i>Present</i>
Podar International School, Mumbai, IN • Cambridge Advanced/Advanced-Subsidiary Level Examinations	March 2021 – February 2023

EXPERIENCE

Casual Academic, UNSW School of Computer Science and Engineering • Tutor for COMP1531 (Software Engineering Fundamentals), supporting a cohort of 25 students across weekly labs and office hours • Delivered targeted, one-on-one debugging and design guidance, raising student proficiency with agile/version-control workflows • Graded assignments and project milestones against course rubrics, providing consistent, constructive feedback across the cohort • Invigilated end-of-term examinations, ensuring exam conditions and academic integrity policies were upheld	Sep 2025 – <i>Present</i>
Front-End Intern, TikTok • Built internal micro-frontend tooling adopted across the TikTok LIVE team, streamlining day-to-day development workflows • Shipped changes through code review, debugging, and testing cycles to maintain quality across a large-scale production codebase • Gained hands-on experience with monorepos, PPE staging environments, and internal build tooling	Feb 2025 - May 2025
UI/UX Designer, DevSoc, UNSW • Designed and prototyped interfaces in Figma (low-fi wireframes and hi-fi mockups) for tools used by UNSW students • Helped maintain a shared UI component library, cutting duplicate design work across DevSoc projects	Feb 2024 - Dec 2024

PROJECTS

<u>Hypr-settings</u> Settings panel for the Hyprland window manager, unifying Wi-Fi, Bluetooth, display, sound, appearance, and system controls in a single GUI • Python, PySide6 • CLI flags to open directly to any tab for integration with keybind daemons; single-instance enforcement via file lock • Reproducible Nix dev environment	June 2026
<u>Quarry</u> Centralized app launcher, clipboard manager, calculator, file searcher, AI interface, rofi replacement, shortcut launcher etc for Linux (<i>in continuous development</i>). • Svelte, Tauri, Rust • Regex-based command-routing via user-editable TOML config; custom providers and shortcuts without code changes • System tray + global hotkey toggle via companion Rust binary; reproducible Nix dev env with multi-distro CI pipeline	December 2025
Automation of Fetal Myocardial Index Calculations Automated DICOM-based MIC calculation web app, replacing a manual clinical workflow with an automated pipeline • Python, ReactJS • Parsed DICOM ultrasound imaging data to automatically extract myocardial performance index measurements via a clinician-facing web front-end	January 2026
<u>Meditator</u> Meditation tracker that helps gamify the habit. Built for a university Hackathon • Dart, Flutter, Material Design	December 2024

SKILLS

Languages and Frameworks Python, JavaScript, C, C++, Rust, Java, Dart, Bash, VimScript, ReactJS, Svelte, NextJS, Tauri, PyTorch, OpenCV
Tools & Other Figma, GNU/Linux, LaTeX, Typst, Claude Code, Technical Writing, Graphic Design, Microsoft Office, Neovim
